DETAILED ACTION

The amendment filed on 6/25/03 has been entered. Claims 1-75 have been canceled (6/25/03). New claims 76-98 are pending and under consideration by the Examiner.

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 76-79, 81-83, drawn to a nucleic acid encoding human TIE-2 ligand, vector, host-vector system, and a method of producing the polypeptide, classified in class 435, subclass 69.5.

Group II. Claims 80, 86-98, drawn to a Tie-2 ligand polypeptide, classified in class 530, subclass 351.

Group III. Claims 80-84, drawn to an antibody to a Tie-2 ligand polypeptide, classified in class 530, subclass 387.9.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-III are independent and distinct, each from the other, because they are products which possess characteristic differences in structure and function and each has an independent utility, that is distinct for each invention which cannot be exchanged. The polynucleotide of invention I can be used to make a hybridization probe or can be used in gene therapy as well as in the production of the specific protein of interest. The protein of invention II, can be used as a probe, or used therapeutically or diagnostically, e.g. in screening. The antibody of invention III can be used to obtain the polynucleotide of Group I, and can also be used in diagnostics, e.g. as a probe in immunoassays.

Art Unit: 1646

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the protein can be prepared by materially different processes, such as by chemical synthesis, or obtained from nature using various isolation and purification protocols.

Having shown that these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and recognized divergent subject matter as defined by MPEP § 808.02, the Examiner has *prima facie* shown a serious burden of search (see MPEP § 803). Therefore, an initial requirement of restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 C.F.R. 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).
